# **PART 1: INTRODUCTION**

Our project is mainly regarding the Covid-19 situation. We decided to choose this topic which is 'Awareness/Information Portal' among those 5 topics because we feel that there are still lots of people who don't really know how serious the current pandemic is. Furthermore, we hope that by looking at the information on our website and story shared by users around the world with their experience, people will have a better understanding of the situation and know how to take precaution on it.

## **Project Purpose**

The name of our webpage is 'Pandemonium 19'. The purpose of our project is to design/create a website that allows users to find the information about the current pandemic easily and also to allow users to purchase some merchandise like masks and hand sanitizers. Besides that, our website allows users around the world to share their experience or story of Covid-19 or even how to prevent it. This action is good for those people who do not know how serious this pandemic is and how to prevent it efficiently. Other than that, we are to create a different interface for admin sites which allow admin users to manage the user, products data and so on. For example: when a normal user logged in to the website, it will bring the user to the user interface; In the other hand, if an admin is logged in it will bring the user to the admin page.

## **Project Scope**

1. 'Pandemonium 19' is designed to allow users to view the cases of the pandemic around the world and also to have an extra knowledge about the movement control order / relaxed movement control order.
2. Besides that, it is also designed to allow users to purchase our merchandise.
3. For these websites, the user must have an account and are logged in before they can do anything.
4. The project will be conducted from 10 December 2020 to 02 March 2020
5. The project will be conducted online due the Covid-19 pandemic.
6. The project will allow users to share their story to others around the world.

## System Features

- **Admin & User**

- Log in Page: Prompt existing users to log in their account in order to access our website.
- Register Page: Prompt new users to signup/register a new account in order to access our website.
- Forgot Password Page: Send a reset password email to user with default password, abc123.

- **Admin**

- Admin Home Page: (Landing page) Menu of all available pages.
- Manage User Page: View/Edit/Delete users from the database.
- Manage Product Page: View/Edit/Delete/Add products to the database.
- Manage Testimonial Page: View/Edit/Delete/Add testimonials to the database.
- Contact Us List Page: View/Delete the records on the database which users requested us to contact them.
- Print Feedback Page: View/Delete user feedback on the database.
- Navigation Bar: Aid admin to accessing other pages.

- **User**

- User Home Page: (Landing page) Display the number of Covid-19 cases and related tabulated statistics. Also, display the rules & SOP in Malaysia.
- Merchandise Menu Page: Display a menu list of our merchandise items, such as face masks and sanitizer.
- Item Description Page: Display the details of particular item after the user clicking an item.
- My Cart Page: Display all the records of user added items to the cart.
- Covid-19 Testimonials List Page: Display the testimonials/stories regarding to Covid-19. Can be sorted by storyID (default) or based on the number story views.
- About Us Page: Display the information and photos of the website's creators.

- Contact Us Page: Allow users to leave a message to the admin and once the admin sees the message, we will reply as soon as possible.
- Feedback Page: Allows users to rate on the website or drop down some comments regarding the websites.
- View Profile Page: Display the important information of user.
- Edit Profile Page: Allow users to modify their personal information details.
- Navigation Bar (with drop down list): Aid user to accessing other pages.
- Footer: Include the website's logo and have a navigation to Contact Us page.

## **PART 2: PROBLEM STATEMENT/OBJECTIVES**

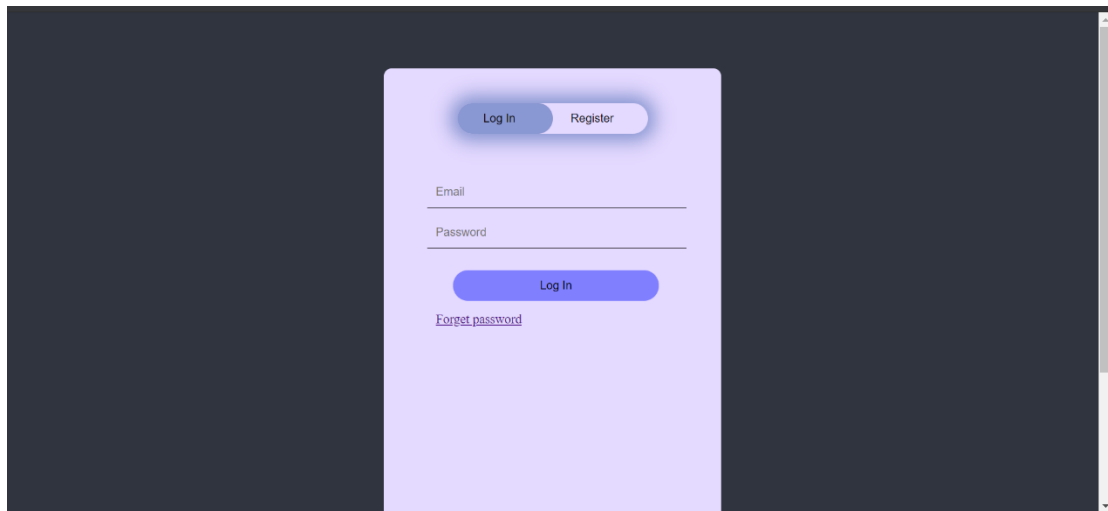

### **Problem Statement**

Ideally, users should be able to get all their needs regarding Covid-19 in one go. In reality, only some of this is true. In this specific case, multiple websites need to be viewed in order for the user to satisfy their needs regarding Covid-19, they need to interact with various sources as well, which may be inconsistent. At any moment, information that a user viewed can be debunked as fake. In consequence, a user is misinformed, and may cause mass misinformation if shared with other people. Other than that, the speed on which important information may be delayed to the user if access to this sort of information is hard, this will cause hardship between ill-informed persons. The problem may be small, but over many reiterations, it may cause a loss or big hardship in the users' time, or convenience.

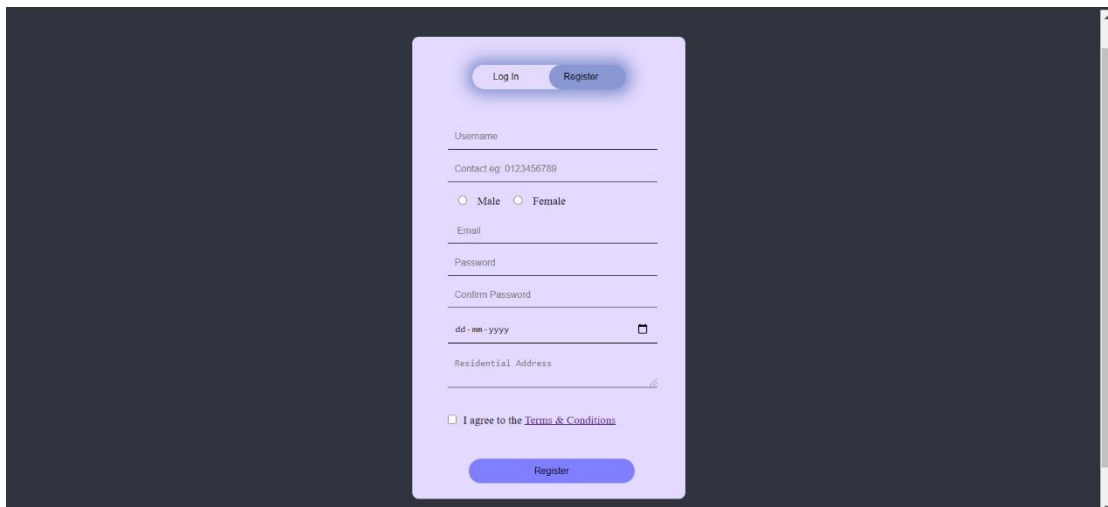

### **Objective**

The main objective for this project is to prepare a platform on which users can get their needed dose of Covid-19 information securely and speedy. It would make acquiring information a better experience and more convenient for users with a good user-friendly and intuitive interface. This method of information sharing could be beneficial for our earth as well as ourselves, as it avoids paper and conveys all information digitally, no physical form of touch is needed, promoting sanitary methods of conveying information. Not only that, as this project conveys everything Covid-19, it supports the ability for commerce as well. It attempts to boost the use of e-Commerce to be commonly accepted in our society.

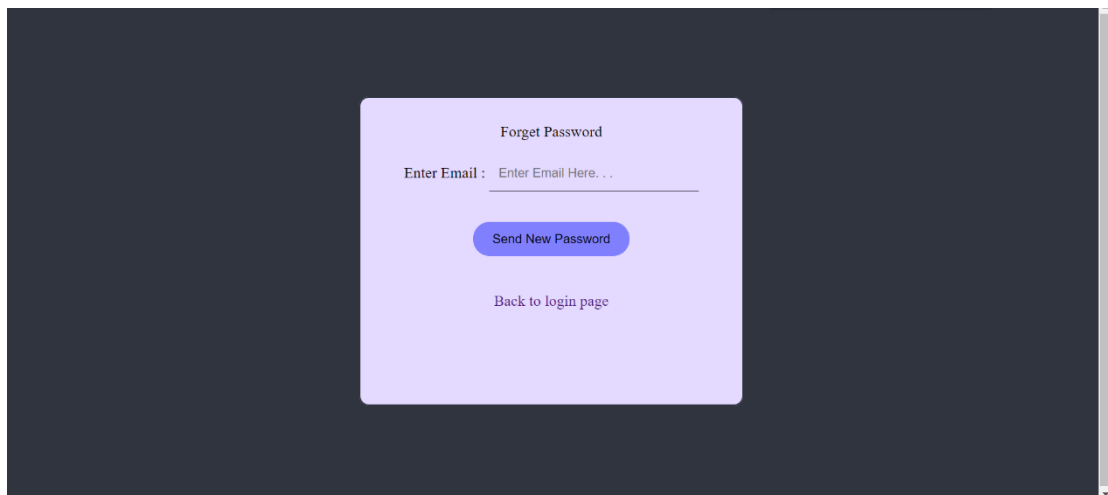

## PART 3: SCREENSHOTS OF WEBPAGE

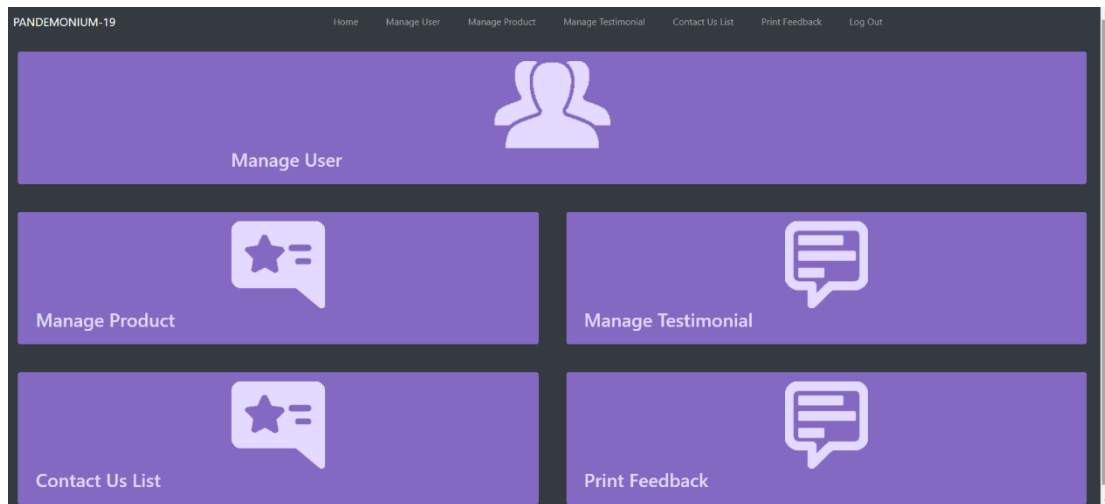

**Figure 1: Log in Page**

**Figure 2: Register Page**

**Figure 3: Forget Password Page**

Story  

Elsa Lisseth Reyes-Amaya was pregnant when she was hospitalized for a serious case of COVID-19. Multiple departments across Johns Hopkins Medicine worked together to treat her and monitor her pregnancy. Four months later, Elsa safely delivered her daughter, Sofia.  
  
In late March, Elsa developed a headache. She started to run a slight fever and noticed some body aches. She called her doctor, who said it was probably due to her body experiencing

Standard Operating Procedure

### Movement Control Order

**Affected States:**

In an announcement on 11 January 2021, it was announced that the Movement Control Order (MCO) similar to the one we all faced in March 2020 will be implemented for 14 days in a few states across Malaysia.

- Social activities such as festive celebrations, seminars, seminars, and group sports are not allowed except in states under PPKM.
- Interstate travel is banned nationwide, and roadblocks will be placed across the country (at all district and state borders) from 12:01AM, 11th January 2021 onwards.
- Individuals may only head out to locations within a 10km radius of their homes for the purchase of groceries and necessities, with a maximum of 2 passengers per car from the same family.
- Movement in and out of MCO areas for emergency cases such as death and due to natural disasters can be done upon obtaining permission from the police.
- Individuals caught violating the MCO orders can be fined a maximum of RM1000 under the Prevention and Control of Infectious Diseases Act 1988.
- Only 5 sectors categorized as Essential Economic Sectors will be allowed to operate during this period: pengilangan dan pembuatan (manufacturing and production), perkhidmatan (services), perkhidmatan (essential services), perdagangan dan pengedaran (trade and distribution), and perladangan dan hasil (agriculture and commodities).
- Nevertheless, only 30% of employees in the management level will be allowed in the office, and the SOP has to be complied strictly.
- Detailed guides on SOP and a full list of businesses allowed to operate during the MCO period may be obtained on the [Ministry of International Trade & Industry \(MITI\)](#) website.
- For businesses in the non-essential services, work-from-home arrangements are mandatory.
- Restaurants and F&B outlets (including food stalls, food trucks, road side hawkers, food courts) can only provide takeaway and food delivery services, and are now allowed to operate from 6AM - 10PM from 22 Jan 2021 onwards.

### Relaxed Movement Control Order

**Affected States:**

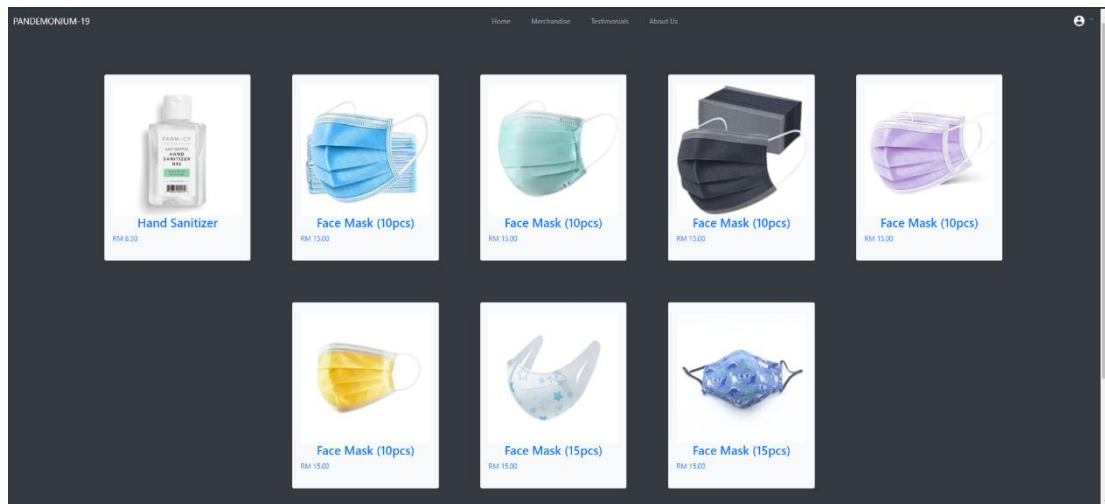

- Business events related to meetings, incentives, conventions and exhibitions are allowed to operate in compliance with safe distancing, mandatory use of face masks and based on the SOPs.
- Face-to-face meetings of Government and private agencies in offices, hotels, convention centers, etc. are allowed with physical distancing and wearing face masks.
- Creative industry sectors and activities are allowed according to SOPs decided for the industry.
- Business meetings attending business events from Government authorized countries must adopt the existing One-Stop Center (OSC) MCO platform in compliance with the entry requirements set by the Government.
- Movement within PPKM areas, to other PPKM areas and PPKM areas is allowed.
- However, movement to PPKM areas requires permission from the Royal Malaysia Police.

Information updated: 19/1/2021

## **PART 4: CONCLUSION**

With the good communication and helping between each other of the members of the project which are Chan Lin Chee, Matthew Labial John, Yong Jing Ping, Ho Ko Ee, and Chew Zhi Peng, the completion of this project could not be completed without the participation of them. Their amazing contributions are deeply appreciated and helpful which is encouragable between each other. The process of the project is tough, especially in this project we face a lot of challenges like deciding the title of our project, we used voting in order to make a final decision to decide which type of project is the most suitable to develop, at the end we choose to develop a Covid-19 Awareness Website which the title is “Pandemonium 19”. The reason why we are choosing the title is because we want people to have awareness, to adopt the new normal, daily Covid-19 doses, and be concerned about the world's current situation and appeal to them to buy the pandemic prevention items, so our group decided to choose this title as our project since a lot of people are still not cautious about the pandemic. The second problem we encountered is when we need to decide the database of the phpMyAdmin, it takes us one week to complete the complete database of the project title. As a member of Group 8, I, Chew Zhi Peng, want to thank all the hard work and the help of our Group 8 fellas. Moreover, we respect and thank Madam Aziah Binti Ali for giving us a chance to do this project work and giving us all the support and guidance, which make our project accurate and successful.

We are really grateful because we managed to finish our project in the adequate time given by Madam Aziah. Last but not least, we would like to express our gratitude to our friends and anyone who participated in this project for support and encouragement to spend some time with us.

2	<b>Solution and Next Target</b>	All
2.1	We are targeting finish 70% work include pages, logics and databases before 10 February 2021.	
2.2	After the design, each one us need to implement the pages for their HTML and JavaScript. At the same time, the database can be created by using phpMyAdmin too.	
2.3	Please push up the product that you've done for the page into GitHub. It will be easier because we can access the files and help to correct each other's.	
3	<b>Next Meeting</b>	All
3.1	14 February 2021	

The meeting adjourned at 4:00 p.m.  
Prepared by: Yong Jing Ping

## APPENDIX

<b>Meeting No.</b>	4
<b>Project Title</b>	Awareness / Information Portal [ PANDEMONIUM 19 ]
<b>Date</b>	14 February 2020
<b>Time</b>	10.00 a.m. - 12.00 p.m.
<b>Venue</b>	Google Meet

### ATTENDANCE

<b>Present</b>	<b>Absent</b>
1. Chan Lin Chee 2. Chew Zhi Peng 3. Ho Ko Ee 4. Matthew Labial John 5. Yong Jing Ping	<i>none</i>

<b>NO</b>	<b>ITEM</b>	<b>INFO/ACTION</b>
1	<b>Finalized User Pages Content</b>	All
